What is the definition of being "homebound?"

"Homebound" means a patient is unable to leave home without considerable and taxing effort.

CRITERIA 1	AND	CRITERIA 2
Needing the aid of a **supportive device** due to illness or injury: ■ Crutches, canes ■ Wheelchair ■ Walker ■ Use of special transportation ■ Assistance of another person in order to leave home, including for cognitive or psychiatric impairments **OR** Having a condition where leaving home is medically contraindicated.		Normal inability to leave home and leaving home requires considerable and taxing effort: ■ Exacerbated symptoms from leaving home, e.g., shortness of breath, pain, anxiety, confusion, fatigue

Patients who leave home infrequently for short durations or for health care MAY STILL be considered homebound. These situations may include (but are not limited to):

- Attending a religious service
- Going to get a haircut
- Walking around the block
- Attending a family event, funeral, graduation or other unique event
- Receiving outpatient kidney dialysis
- Receiving outpatient chemotherapy or radiation therapy

Physician documentation in the patient record must support how/why the patient is homebound and requires skilled services.

EXAMPLE 1	EXAMPLE 2
Patient is confined to the home due to unsteady gait and needs assistance to ambulate secondary to CVA. The patient needs home nursing care for medication teaching and disease management and physical therapy for falls risk reduction and a home exercise program.	Patient is confined to the home due to s/p recent total knee replacement and currently walker dependent with painful ambulation. PT is needed for therapeutic exercise and gait training.
